COVER LETTER

I am a WordPress & CMS Specialist with 5+ years of experience delivering 60+ websites across agency and freelance environments. I am reaching out to express my interest.

In my current role, Handling end-to-end WordPress development, CRM integrations, technical SEO, performance optimization, and website security. Proficient in WordPress development, utilizing Elementor, WooCommerce, ACF, Zoho CRM, and GoHighLevel to create high-performing, conversion-focused web solutions.

What sets me apart from a typical WordPress developer is my modern development workflow. I design UI mockups using Lovable and Google Stitch, convert generated HTML/CSS (Tailwind | Bootstrap)/JS into Elementor JSON templates, and deploy them as fully functional WordPress pages. I also use AI tools including Claude, ChatGPT, Gemeni and Cursor to implement custom features and plugins efficiently — allowing me to deliver solutions faster without compromising quality.

I have worked directly with international clients and stakeholders across UAE, USA, and UK, both in employed and freelance roles, and I am comfortable working independently as well as within teams.

I would love the opportunity to bring this experience to your team.

Best regards,

Syed Muhammad Hammad Tariq
